

## [LAESP] Versitech e-Form Filler software download for Mac OS Version 1.0

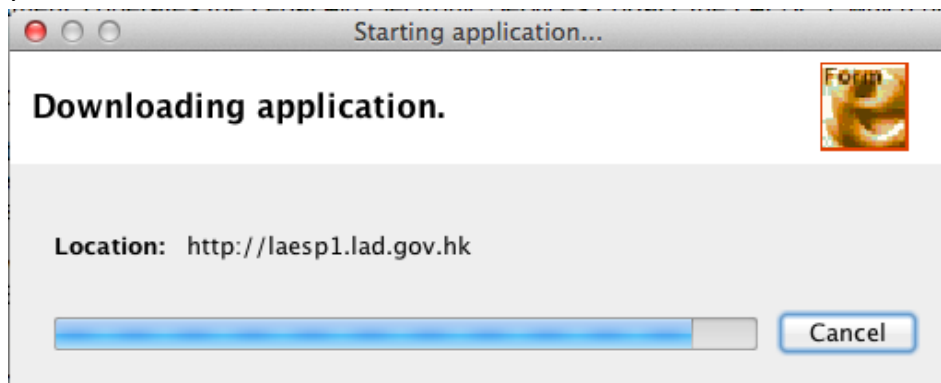

1. Download e-Form Filler software by inputting the following link using the browsers (Mac Safari or Mozilla FireFox) in Mac OS.

<http://laesp.lad.gov.hk/versitech/jnlp/eform-filler.jnlp>

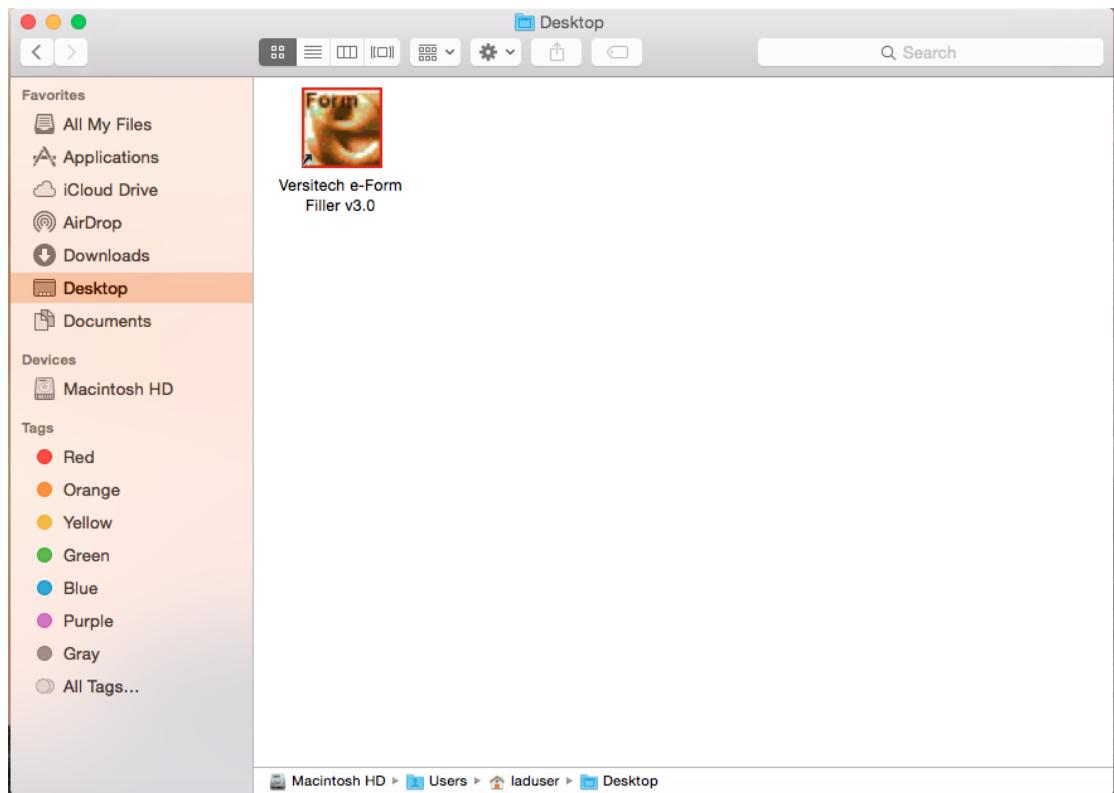

Press the download icon in the rightmost corner of the screen and click the JNLP file (eform-filler.jnlp) to install the software.

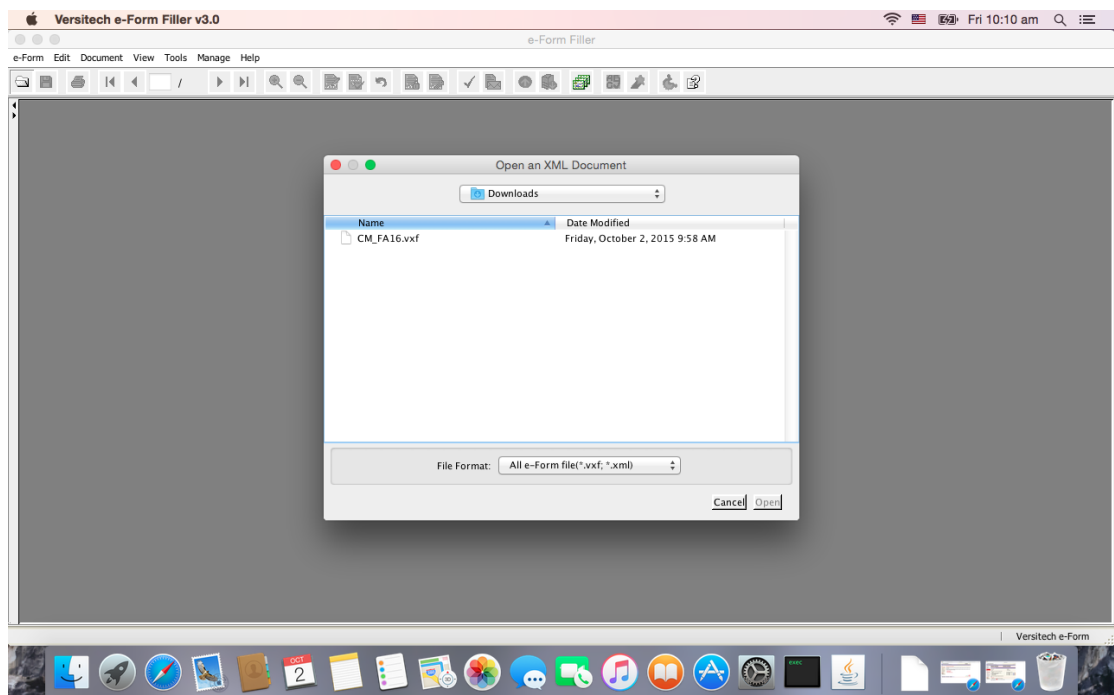

2. You will then see the Versitech e-Form Filler software to start downloading to your workstation.

3. Versitech e-Form Filler software is installed to your workstation successfully if you can find related icon under the Desktop folder.

4. To launch the e-form software, double click “Versitech e-Form Filler v3.0” icon. Then press the “e-Form” => “Open”, click the downloaded e-form and press “Open”. You can now start inputting data into the e-form.

5. It is assumed that Java has been installed in your Mac machine before the above operations. If not, please go to <http://www.java.com> to download.
